Please join us on the 16<sup>th</sup> January at 3.00pm to discuss the exciting new building project due to start at the end of the term.

### **STREP A**

#### **Advice for parents and carers on common winter bugs and viruses**

With lots of common winter bugs and viruses circulating at the moment, the NHS in Gloucestershire, including the Paediatric consultant team, has developed advice for parents and carers of children to help care for them at home or know when health advice may be needed.

There is understandable concern amongst the public following reports of children and young people with Strep A or Scarlet Fever going on to develop serious illness. However, health leaders are reassuring people that Scarlet Fever is usually a very mild illness that can be easily treated with antibiotics, and it is very rare for children to go on to develop the more serious illness known as invasive group A strep (iGAS).

Please do read and bookmark the advice and share with friends and family:
